DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-47 and 62-81, drawn to a polynucleotide encoding an enzyme with flavanone-7-O-glucoside-2''-O-rhamnosyl-transferase activity, plants and plant cells comprising said polynucleotide.

Group II, claim(s) 48-57, drawn to a commercial process.

Group III, claim(s) 58-61, drawn to an in vitro enzyme reaction.

Group IV, claim(s) 82-83, drawn to a knockout mutant.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature linking Groups I-IV is an enzyme having flavanone-7-O-glucoside-2''-O-rhamnosyl-transferase activity that fails to advance the prior art because it was taught prior to the filing date of the application 7/20/2001 (Wang SM *et al.*, Plant Physiology, Feb. 1997, 113(2):403-409; see Abstract).

Art Unit: 1638

Because the inventions are distinct for the reasons given above and have required a separate status in the art as shown by their different classifications, recognized divergent subject matter, and because the search required for one of the groups is not required for another restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37) CFR 1.143).
